Field Control Therapy

*The laws of physics apply to every natural or man-made system. They apply equally to living systems.*

*“Future medicine will be based on controlled energy fields.”*  
William A. Tiller, Professor Emeritus, Stanford University, USA

**Seminars hosted by  
FCT® World**

## *A medical breakthrough:* **Health Through Restoration of Cellular Fields**

Field Control Therapy® (FCT) is an exceptionally powerful cutting-edge system of integrative medicine. It draws from essential knowledge in both alternative and conventional fields to comprise:

- (i) a **deep and comprehensive understanding** of health, illness, key priorities and energy medicine;
- (ii) a **new diagnostic technique** to uncover the true causes of all illness, drawing from bio-resonance/ kinesiology but with revolutionary new means of screening very deeply & for correct order of priority;
- & (iii) **powerful therapeutics** based primarily on a unique innovative system of causative homeopathy.

**This course of study will drastically change the way you view and practise medicine and outstanding clinical results will follow. You can apply this system to any illness.**

*Presented by Savely Yurkovsky, MD, author, teacher and speaker, who has evolved FCT® over many years of clinical practice and study in New York. FCT® is at the forefront of an emerging paradigm in medicine. Patient referrals for FCT® treatments are now sought worldwide.*

FCT® can benefit any health professional, including doctors, dentists, naturopaths, homeopaths, acupuncturists, kinesiologists, osteopaths, healers and herbalists. Learn how to identify and remove toxicological, biological and other key causative agents in illness. Regardless of your area of specialization, you will at last be able to resolve those stubborn **“obstacles” to cure** and previously incurable **“difficult cases”** using the ingenious methods of FCT®.

**Basic Level Curriculum:** 3 Full Days

**Complete introduction to the FCT® system of medicine.**

Note: also available as a DVD Box-set, comprising 9 high quality discs of the live seminar from Oct 2004, complete with extensive course notes and materials for home study, at a rate slightly reduced compared to the seminar itself.

**Advanced Level Curriculum:** 3 Full Days

**Excellence, in-depth topics and latest breakthroughs.**

Follows on from the Basic Level. Note: also available as a DVD box-set, comprising 9 high quality discs of the live seminar from July 2005 plus course notes and materials for home study.

Book your place or order the DVD box-sets using the enclosed form. We also run advanced practice courses.

# BASIC LEVEL FCT<sup>®</sup> PROGRAMME (3 days):

## I. Cohesive Basis for a New Paradigm of Medicine

1. **Advanced pathologies and difficult cases:** the real test of any therapy. **Presentation of a case:** the dismal ordeal of a young woman that caused 32 healthcare practitioners, conventional and mostly alternative, to stumble. Furthermore, her pitiful journey had begun with 1 complaint and, years later, ended with 20. Do you have an answer?
2. **Examining the lock** instead of buying endless new keys.
3. **Bio-energetic domains** as the most fundamental force in health and disease. Concept of human physiology as one of a **biological quantum system**. Proposed expansion of medical model introduced by Prof. William A. Tiller.
4. Main constituents of **homeostasis**. The **pernicious factors** that cause breakdowns in homeostatic integrity and lead to diseases: toxicological, biological, physical, emotional, lifestyle-related, miasmatic, iatrogenic, etc.  
Recognition of **the most endemic disease factors** in all industrialized nations: silver amalgams, other heavy metals, and opportunistic infections – their pre-eminent role in the pathogenesis of all chronic diseases. **Widespread poor genetic adaptation** to the many social, dietary, environmental and electromagnetic changes of the past century.
5. Diseases as **strictly individual states**.  
**Stages** of their pathological advancement. ‘Five Element’ anatomy and **multi-systemic nature of all diseases**. Key relationships between toxicological agents and afflicted immune, endocrine, vascular, excretory and other organs and systems. **Dynamic, changeable nature** of disease states. Key **properties of living systems**: open, dynamic, complex. Toxicology and the law of **minimal intervention**: *take out* rather than *put in*.
6. **Opportunistic organisms**, such as candida, as major reservoirs and carriers of toxins in the body: the **Trojan Horse phenomenon** – a main cause of the tenacity of chronic diseases. **Importance of caution with candida**, and in the use of **probiotics**: uncontrolled mass re-release of toxins into the system when candida is attacked.

## II. Serious Limitations of Current Medical Approaches, Conventional and Alternative

7. **Current prevailing models** for the practice of medicine.  
True value and meaning of phrases such as ‘**scientifically proven**’ and ‘**scientific discoveries**.’ **Common pitfalls** in relation to disease states. Man as a **complex system** and **The Law of Unintended Consequences**. Strain vs. stress. Lack of integrated information and understanding. Chasing after infinite variables and parameters vs. establishing **real meaning and priorities**.
8. **Evaluation of existing diagnostic methods**.  
Based on: (a) **body chemistry** (blood, urine, saliva, stool, hair analysis, nutritional-metabolic, allergy screening, and others); (b) **body morphology**: (imaging techniques, craniosacral assessment, iridology, hara diagnosis, Mayr diagnosis, live cell/darkfield microscopy, and others); (c) **energetic aspects of the body** (ECG, EEG, EMG, MRI, SEG, positron emission tomography, Bio-Resonance testing – kinesiology / CRA / EAV / VEGA / NAET, classical homeopathy, TCM, and others).
9. **Common diagnostic errors**.  
Ignoring **inaccessibility** of key bodily tissues and layers – assessing only superficial fluids and tissues, and gathering **fragmented information**. **Bio-Resonance testing** as the only diagnostic approach capable of establishing the true causes of chronic diseases; **common severe pitfalls** of existing Bio-Resonance approaches.
10. **Evaluation of existing therapeutic methods**.  
Critical analysis concerning supplements/medications, chelation therapy, nutritional and herbal approaches, classical homeopathy, complex homeopathy, homotoxicology, TCM, neural therapy, oxygenative therapies, magneto-therapy, cranio-sacral integration, sound and colour therapies, radionics and others.
11. **Common therapeutic errors**.  
Using **non-energetic means** which do not penetrate the deepest levels of human physiology, having only a superficial action. Unawareness of limitations and **potential for aggravations**. Unrecognized **obstacles**. Failure to distinguish important clinical interrelationships between the toxicological, immune, infectious and endocrine factors, and hence the frequent addressing of **non-essential findings** or treatment in the **wrong sequence**.

## III. Hands-on FCT<sup>®</sup> System of Diagnosis and Therapy: Presentation & Guided Practice

12. Basic hands-on **supervised practical testing**. No machine. Totally **non-force, simple method** eliminating the **fatigue factor** and practitioner’s physical **subjectivity**. Introduction to the **FCT<sup>®</sup> algorithm** and basic sequence of **test steps**.

13. **Live testing demonstrations**, including volunteers from the audience.
14. **The revolutionary breakthrough in the testing** – introduction of the **Multi-Energetic Layer (MEL) filters**, based on the physics of cellular energetics. Their use to uncover deep toxins defying detection by any other method.  
**Deep “vertical”** nature of the technique: testing from the cell periphery down to intracellular structures including **DNA**. Specific screening of **energetically silent organs and tissues**. Establishing **key priorities** in diagnosis and treatment.
15. Novel use of **causative homeopathic remedies**: isodes and sarcodes.  
Precision; timing; potencies. Providing deep **therapeutic support to multiple organs and tissues**, thereby greatly enhancing therapeutic efficacy and minimizing aggravations. Addressing the **lymphatic system**, especially in multiple chemical & electromagnetic field (EMF) sensitivity/immune disorders. Use of homeopathic **autoisodes** (potentized bodily fluids).
16. **Testing**: (a) **yourself, babies, children, people with disabilities, pets**; (b) for the safety, effectiveness, dose and timing of **medicaments**, dental materials, supplements; (c) **foods and allergies**; (d) for homeopaths, acupuncturists, dentists, craniosacral practitioners, nutritionists, herbalists. Presentation ‘from head to toe’ of the many **pathologies which have responded well** to FCT<sup>®</sup>. Indications and contraindications for combining the FCT<sup>®</sup> system with **other therapies**. Awareness of key **blocks in therapy**: EMFs; dietary; dental; medicinal; emotional; incorrect timing of follow-ups.

## **ADVANCED LEVEL FCT<sup>®</sup> PROGRAMME (3 days):**

Note: due to space constraints, the Advanced programme, despite its extensive topics, is reproduced here in slightly less detail than the Basic.

### **I. Latest Breakthroughs and Perspectives**

1. **Radical new methods** for thorough sarcodal treatment of organs/tissues at a level far deeper than previously possible –
  - (a) **DNA Scraping**;
  - (b) **RNA Cleaning**.
2. Multi-layer testing in **infectious diseases**. Treating **influenza** and other **viral, bacterial and fungal infections**.
3. **Explosive patients' constitutions** – over-reactors and universal reactors; their recognition and management.
4. **Recurring symptoms**. . . “What could I be missing?”

### **II. Advanced Topics**

5. **“Doctor, how long will it take me to get well?”** Patient response. Derivative factors. Miasms. Constitutions. Pace of therapy. Potency choice. Organ support. Compliance. Environment. Lifestyle. Practical examples.
6. **Speed testing**. Handling sudden acute emergencies. Testing under the pressure of time. Taking shortcuts.
7. What FCT<sup>®</sup> can offer to **cancer patients**.
8. FCT<sup>®</sup> management of **dental infections**. Assessment of **dental issues**. Bio-Resonance testing for **amalgam leakage**.
9. The **significance of “skipped” most stressful organ(s)** in the testing sequence for therapy purposes.

### **III. Excellence in FCT<sup>®</sup> & Guided Practice**

10. Advanced hands-on **supervised practical testing**. Building confidence. Detailed review of the **FCT<sup>®</sup> algorithm** and full sequence of test steps. Live demonstrations: testing a **visiting difficult patient**. Case management and analysis. Students sharing their **clinical/testing experience** with FCT<sup>®</sup>. **Questions and answers**.
11. Improving your **mental testing “software.”** Levels and order of priority. **Choosing correct potencies**. Optimum ranges. Subliminal testing.
12. **Clinical quizzes**: matching patients' complaints with the most common corresponding organs/tissues affected and making **proper physiological connections** based on the signs and symptoms.
13. **Autoisodes and probiotics**: deeper understanding of uses, dangers, candida die-off, Trojan Horse and warehouse phenomena. **Intestinal lymphatic screening**. **Antibiotic residues**: key connection to candida, placing greater emphasis on their importance, tips/pointers.
14. Using and choosing **other supplementation**: glandular extracts, colon cleansers, vitamins, trace minerals, etc. Offering extra remedies for **acceptance**. Importance of offering remaining unaddressed **suspected sarcodes**.
15. **Treating traumas and scars**: review of useful pointers/tips.
16. Deeper analysis of **safe and unsafe therapeutic actions** and/or combining of **other therapies** with FCT<sup>®</sup>.

# MORE ABOUT FIELD CONTROL THERAPY®

## ◆ BIO-ENERGETIC TERRAIN ◆

Louis Pasteur, father of the “germ” theory of disease, famously conceded on his deathbed that “*Le microbe n'est rien, le terrain est tout*” (The microbe is nothing, the terrain is everything). In spite of this, the assumption prevailing in modern medicine, both conventional and alternative, is that symptoms of ill health can be corrected at a chemical level by ingesting substances or manipulating structures. A new movement in integrative medicine, however, understands that the biological terrain is more important, governed as it is by the more fundamental science of physics, not by chemistry. In particular, the cellular electromagnetic fields actively control all structural and chemical activity in the body. In order to address the true causes of illness it is necessary to use methods which can interact with these cellular fields in both diagnosis and treatment. There have been various medical modalities, both ancient and modern, which work at this deeper energetic level, but until now all the old wisdom and new scientific innovations have not been brought together into one clinically successful and cohesive system. FCT® spearheads this new integrative paradigm of energy medicine with a system which draws on the best methods available in many fields but refines them into a unique and far more sophisticated therapy than its predecessors.

## ◆ THE METHOD OF DIAGNOSIS ◆

FCT® employs a hands-on method which draws partly on the sound principles of the Bio-Resonance/kinesiology testing tradition, but in a unique form much more advanced than others currently practised. No Bio-Resonance machine is used, making it far more cost-effective and accessible, and moreover more sophisticated, deep and accurate due to the pioneering use of special filters. Results are assessed in their exact order of clinical priority. Instead of applying force and/or electricity (as in the popular kinesiology arm test, or with a Bio-Resonance skin probe), a non-force kinesiology test is used, which makes testing more objective, precise and versatile. It can also be done on a patient in a coma or asleep. Allergies or deficiencies can be assessed too, as well as the most ideal dietary/supplementary/herbal choices and strengths.

*“Any Bio-Resonance testing method is merely hardware, a microphone, be it a \$30,000 sophisticated computerized piece of technology, or a bare hand. There is no perfect microphone – only a perfect way to ask pertinent fundamental questions (the testing software) through it.”*

## ◆ THE METHOD OF TREATMENT ◆

Modern research has shown that homeopathic remedies contain electromagnetic imprints capable of interacting with and altering cellular fields. Together with other remedies such as probiotics or trace minerals, they are employed in FCT® to stimulate and direct the body’s cellular electromagnetic memory and healing mechanisms to flush out the toxins, parasites, viruses or other noxious influences uncovered by the testing. Specific homeopathic imprints of the noxious factors (isodes) are used, and Dr Yurkovsky has made several groundbreaking discoveries which render their application not only highly efficacious, but also deeper and safer than other methods. Key weakened organs and tissues are targeted for support and detoxification using their respective homeopathic imprints (sarcodes). Remedies are prescribed in a very precise, carefully orchestrated series. The testing algorithm is used to determine optimal potencies, timing and treatment priorities. FCT® treatment protocols are totally non-invasive, non-toxic and well-tolerated, hence they are unrivalled for treating the hyper-sensitive.

*“Ineffective, inadequate or even actively harmful therapeutic means are often applied by practitioners, whatever form of testing is used. FCT® uses a novel form of homeopathy to provide the safest, deepest, most effective and comprehensive therapeutic interventions possible.”*

## Why FCT®?

Conventional medicine has a poor track record as a genuine problem-solving system. The occurrence of chronic degenerative illnesses continues to rise exponentially. 85% of Americans in a recent survey reported they did not enjoy good health. On the other hand, the knowledge base of the vast array of complementary therapies available today remains fragmented, lacking a cohesive, solid basis.

Almost any therapy can claim successes in minor, or less advanced, conditions. Thus the real test is to pay special attention to the difficult, more advanced cases – where the vast majority of medical modalities, conventional or alternative, currently fail to achieve any degree of consistency in long-term cures. Dr Yurkovsky has been treating such serious cases successfully for many years, frequently as the court of last resort, or even, all too often, when other practitioners had unwittingly exacerbated their patients’ conditions. This led him to formulate the FCT® curriculum as a sound, effective, rapidly implemented, low-cost foundation for the genuine practice of integrative medicine.

FCT® enables many different causative disease factors to be identified, assessed, understood, prioritised and treated, such as:

- mercury, lead or other heavy metals • emotional-mental & lifestyle influences • pesticide/chemical residues • parasites
- viral or bacterial infections • candida • nutritional deficiencies • spinal/structural misalignments • dental issues/needs
- radiation, asbestos or other pollutants • unbalanced acupuncture points • weak/malfunctioning organs/tissues • allergies

Testing and clinical successes have revealed not only that almost all illness is rooted in toxicity disrupting cellular fields, but that symptoms of ill health vanish when the “key” toxins are judiciously removed from the body using FCT®.

FCT® can either provide an essential new perspective and platform for the practice of existing specializations and therapies, or it can offer unrivalled tools of diagnosis and treatment which stand alone in the management of any illness. The system can be used to identify and remove blocks in unresponsive patients – or on the other hand it can be given a central role and used exclusively to treat a case. For certain purposes Dr Yurkovsky uses classical homeopathy in its own right alongside FCT® – likewise FCT® can complement other therapies.

Read more online at [www.fctworld.com](http://www.fctworld.com), including details of what FCT® can offer specifically to practitioners of other specialisations and therapies, such as homeopaths, acupuncturists, herbalists, naturopaths, nutritionists, dentists, doctors, healers, kinesiologists, osteopaths, chiropractors, craniosacral therapists, bodyworkers, psychotherapists and others.
