

Heavy Metal Toxicity, Naturopathic Terrain and Field Control Therapy – London Talks

Don't miss these exciting evenings – events packed with essential information and tips for alternative medical practice!

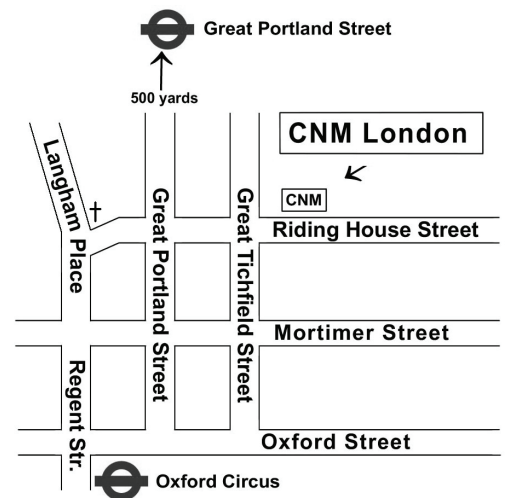

Presenters: **Simon Rees**, Dip.Tuina & CNM student, Dip.FCT
Bob Roberts, Dip.Nat & CNM graduate, Dip.FCT

Dates: **Tuesday 24th April 2007**
Thursday 26th April 2007

Time: Registration 6pm, Presentation 6:30pm - 9pm

Entrance fee: £8 (ANP Members £5)

Venue: College of Naturopathic Medicine (CNM London),
42 Riding House Street, London W1W 7BE.
Tube: Oxford Circus.

Presentation:

- Exciting and comprehensive overview of essential topics in the new era of naturopathic medicine, including:
 - Heavy metal toxicity – effects & sources
 - Heavy metal detoxification – the different available methods
 - Heavy metal testing – the different available tests
 - Holistic mercury-free dentistry
 - An important new bio-energetic understanding of the terrain
 - Bio-Resonance testing
 - Applied Kinesiology
 - Energy medicine
 - Causative homeopathy
 - Electro-magnetic fields – mobile phones, etc: effects on health
- Review of the nature of the naturopathic terrain, with a focus on the ways in which heavy metals affect it, as well as a bio-energetic perspective on the cellular terrain of electromagnetic fields in our tissues and how this interacts with electromagnetic fields in our environment. High quality electromagnetic field meters will be used during the presentation in a live demo of measuring nearby fields, such as mobile phone radiation levels.
- Detailed presentation on heavy metal toxicity: Which heavy metals are the most commonly seen in clinical practice? What are their effects in the body? What are their chief sources? What ways exist to deal with them naturopathically and/or homeopathically? What are the different existing approaches to metal detoxification? Why is it also very important for alternative healthcare practitioners to work in collaboration with holistic dentists – who are they and what do they do?
- The ways in which Simon Rees and Bob Roberts have found Field Control Therapy to be an essential addition to their own clinical practice for dealing with the above issues, and what tools it offers to alternative practitioners such as naturopaths, naturopathic students, homeopaths or kinesiologists, particularly in dealing with heavy metal toxicity effectively. The latter half of the presentation will include a brief live demonstration of Field Control Therapy bio-resonance testing in action, and then a Q&A session.
